DETAILED ACTION

1. Applicant's cancellation to claims 1-7, 17-20, 21-27 and 37-40 is acknowledged.
2. Claims 8-16 and 28-36 are pending in this application.

Election/Restrictions

3. This application contains claims directed to the following patentably distinct species of the claimed invention: the first species drawn to a method of manufacturing a semiconductor device including a first and second lattice matching layers and as disclosed in Figs.1-6 and the second species drawn to a method of manufacturing a semiconductor device including a co-doped germanium layer and as disclosed in Fig.7.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 28-36 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2823

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
